

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Smallpox in Norfolk, Va., and Vicinity During the Year 1909.

Surgeon Wertenbaker reports, March 9:

	Cases.	Deaths.
January.....	6
February.....	7
March.....	2
April.....	26	6
May.....	24	10
June.....	16	1
July.....	1
November.....	2
Total.....	84	17

Distributed as follows:

	Cases.	Deaths.
Norfolk city.....	57	8
Norfolk County.....	16	5
Portsmouth.....	5	3
United States naval hospital.....	3	1
Public Health and Marine-Hospital Service.....	3
Total.....	84	17

The cases developing in January, February, and March, 1909, were all of the usual mild type of smallpox that has prevailed in the United States during the past 12 years, and during those months there were no deaths. In the latter part of March a child came from Frederick, Md., to St. Mary's Orphan Asylum school and on April 12, 1909, developed a case of smallpox from which it recovered. This case was nursed by a sister of the orphan asylum staff who contracted the disease from this case. The sister died from the disease at the Craney Island Hospital. About the early part of April, 1909, 3 cases of smallpox were received at the United States naval hospital, Portsmouth, the patients being members of the Atlantic Fleet that had recently returned to the United States. The type of the disease from which these patients suffered was much more severe than the usual mild type that had prevailed in this section for some years. It is also noted that in April and May the type of the disease in many of the cases was more severe than usual. It will be noted that there were 26 cases and 6 deaths in April and 24 cases and 10 deaths in May, while in June there were 16 cases and only 1 death. In July, 1 case, no deaths. There were no other cases until November, when there were 2.

Reports Received from January 1 to March 18, 1910.

[For reports received from June 25, 1909, to December 31, 1909, see PUBLIC HEALTH REPORTS for December 31, 1909. In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
